GENERAL INFORMATION

The Conference Construction Projects Engineering organized in 2011 by the Unit of Construction Processes Engineering of the Faculty of Civil and Environmental Engineering BTU continues the tradition of conferences made by units engaged in construction technology, organization and economics, which was initiated by Prof. Aleksander Dyżewski. At the same time it is one of the celebration events of the 60th Anniversary of the Faculty of Civil and Environmental Engineering BTU.

CONFERENCE SCOPE

- Preparations for construction projects.
- Building materials.
- Modern construction techniques.
- Construction proces management.
- Cost engineering in construction projects.
- Operation of building objects and ecology in construction.
- Spatial planning in preparation of construction projects.
- Modernization, reconstruction, repairs and renovations of building objects.
- Modern machinery, devices and robots in construction.
- Quality management and quality ensuring systems.
- Safety and health protection in construction.

The aim of the conference is to present the scientific achievements, to exchange knowledge, experiences and practical effects regarding the above mentioned scope.

The Conference is addressed to: university researchers (in Poland and other countries), researchers from scientific institutes, designers, constructors, producers of building materials.
