## GENERAL INFORMATION

The Conference Construction Projects Engineering, organized in 2021 by the Department of Construction and Road Engineering FCEES BUT, continues the tradition of conferences created by units engaged in construction technology, organization and economics, which was initiated by Prof. Aleksander Dyżewski. At the same time it fits in the schedule of the celebration of the 70<sup>th</sup> anniversary of the Faculty of Civil Engineering and Environmental Sciences of Białystok University of Technology.

## CONFERENCE SCOPE

- Preparation, programming and planning of construction investments
- Modern materials and technologies in construction
- Planning and implementation of construction works, including automation and digitization.
- Issues related to the operation of buildings (building real estate management, maintenance of building resources, including modernization, reconstruction, etc.)
- Economics in planning, designing and implementing construction investments
- Implementation and development of modern socio-economic concepts in the implementation of construction projects (environmental protection, sustainable development, life cycle, circular economy, etc.)
- Models and scientific methods in research on the issues of construction project engineering
- Supporting of decision making in the management of the construction enterprise and project

**The aim of the conference** is to present scientific achievements, exchange views, experiences and practical effects related to the above topics. The conference is addressed to university researchers from Poland and abroad, researchers from scientific institutes, designers, construction contractors, producers of construction materials and products.
